Just to tell you, ftp user, to retrieve the following files in BINARY mode:

in this directory: ALIRE.dvi, kb7to8.c, kb8to7.c
in the tests dir: kbtest.tex
in the inputs dir: all files with extension .kbc
frabbrev.tex and frhyphex.tex files
in the tst dir. : frenchrf.dvi and kbto.tex

Remember that all other TeX files are in 7-bit but few ones must
be converted to 8-bit to take advantage of all the facilities provided;
please check the first few lines of these files. A translator 7-bit <-> 8bit
can be generated to help for this purpose (see kb2lex.tex in this directory).

I hope you enjoy it,

lastly modified 99/08/10

Bernard GAULLE
